The Only Thing Cut Down For These Roofs Was The Cost.

Modeled after the highest quality hand-split cedar shakes, yet selling for a fraction of the cost, MonierLifetile Madera represents a quantum leap over other wood-shake products. With its incredibly realistic wood shake surface, MonierLifetile Madera is flexible enough to complement many architectural styles and is available in a wide variety of realistic colors to seamlessly blend with the surrounding environment.

It's designed to hold up to the elements too. Because MonierLifetile Madera is a concrete tile product, it offers a Class A fire rating and is resistant to fire, hail, sleet and snow, making it durable as well as beautiful. And like every MonierLifetile product, it's backed by MonierLifetile's exclusive Non-Prorated Fully Transferable Limited Lifetime Warranty.

MonierLifetile Madera—yet another example of how MonierLifetile, the nation's leading manufacturer of concrete roof tile, delivers the best value, innovation and tile selection to help you realize your creative vision. For more information about MonierLifetile products, call 1-800-571-TILE (8453).
